Write a C program accepts any number find out the reverse number Such as 123=321 using while loop.

```
void main()
{
    int n,rev=0,m;
    clrscr();
    printf("\n Enter any number ");
    scanf("%d",&n);
    while(n>0)
    {
        m=n%10;
        rev=rev*10+m;
        n=n/10;
    }
    printf("\n Reverse number %d",rev);
    getch();
}
```
