Write a program in C to sort the given list of names

```
#include<stdio.h>
#include<conio.h>
#include<stdlib.h>
#include<string.h>
void create();
void display();
void sorting();
void searching();
char name[15][15];
int l;
void main()
{
    char name[15][15];
    char str[15],temp[15];
    int n,l=0,i,j;
    clrscr();
    printf("\n Type 'end' when finished ");
    printf("\n Enter any name ");
    scanf("%s",str);
    while(strcmp(str,"end")!=0)
    {
        strcpy(name[l],str);
        l++;
        printf("\n Enter any name ");
        scanf("%s",str);
    }

    for(i=0;i<l;i++)
    {
        for(j=i+1;j<l;j++)
```

```
        {
            if(strcmp(name[i],name[j])>0)
            {
                strcpy(temp,name[i]);
                strcpy(name[i],name[j]);
                strcpy(name[j],temp);
            }
        }
    }

for(j=0;j<l;j++)
{
    printf("\n %s",name[j]);
}
getch();
}
```
