Setting Path of Java in Windows

There are two ways to set the path in java, First is Temporary Path and second is Permanent Path.

Setting Temporary Path

- Open command prompt in Windows
- Copy the path of jdk/bin directory where java located (C:\Program Files\Java\jdk_version\bin)
- Write in the command prompt: SET PATH=C:\Program Files\Java\jdk_version\bin and hit enter command.

Setting Permanent Path

- Go to My Computer ---> Right Click on it ---> Advanced System Settings ---> Advanced Tab ---> Click on Environment Variables
- Click on New tab of User variables, assign value JAVA_HOME to Variable Name
- java\jdk_version\bin path (copied path) to Variable Value and click on OK Button
- Finally, click on OK button.
